

SOCONY TRACTOR OIL

An Easy Job with the Tractor

Filling the silo is accomplished easily, quickly and well when the tractor is in good shape. But no tractor will operate at all unless correctly lubricated.

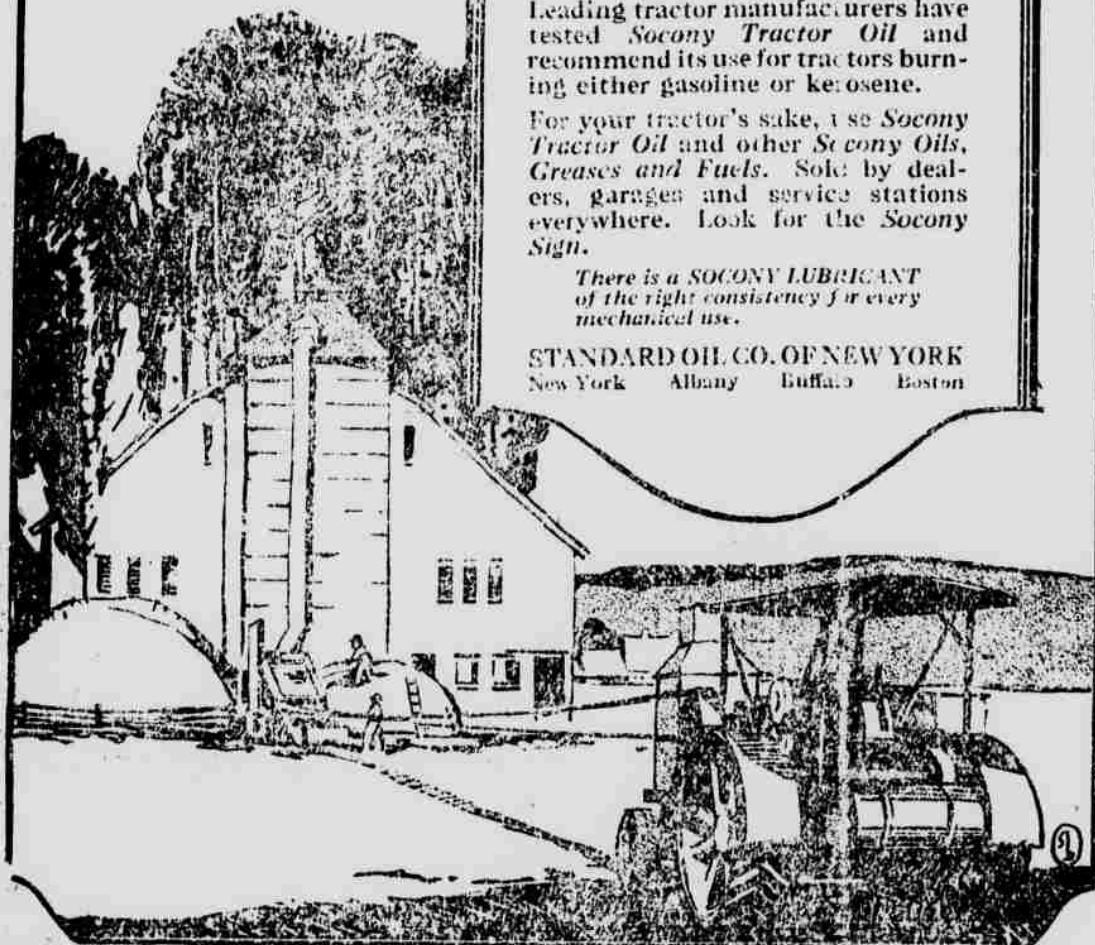

The high operating heat of tractor engines, together with dilution by partially condensed fuel on cylinder walls, tends to thin down most lubricating oils. Socony Tractor Oil meets these particular conditions because it is a special oil carefully formulated by experts. It maintains a tight seal between piston rings and cylinder walls and protects bearings and moving parts.

Leading tractor manufacturers have tested Socony Tractor Oil and recommend its use for tractors burning either gasoline or kerosene.

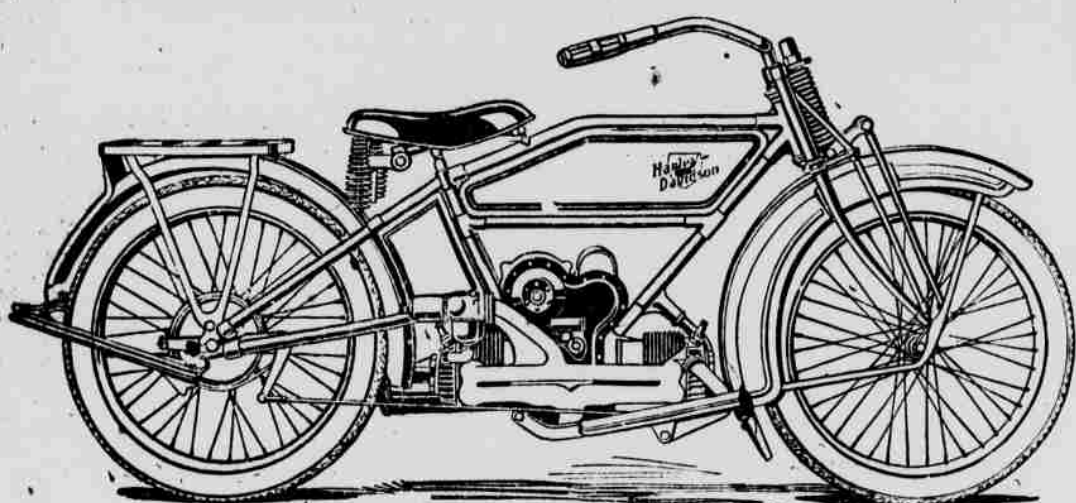

For your tractor's sake, use Socony Tractor Oil and other Socony Oils, Greases and Fuels. Sold by dealers, garages and service stations everywhere. Look for the Socony Sign.

There is a SOCONY LUBRICANT of the right consistency for every mechanical use.
